

Healthy Heart Breakthrough!

Kreta Reserve Super Premium Extra Virgin Olive Oil

*You cannot buy a more healthful
extra virgin olive oil at any price!*

Super High in Antioxidants

♥ Polyphenols are the antioxidants in olive oil.

♥ Kreta Reserve super premium EVOO contains at least **288 ppm** polyphenols* versus **60-80 ppm** in other quality extra virgin olive oils... not chemically altered, this is the natural level of polyphenols our olives!

Professional medical studies have shown the benefits of polyphenols in extra virgin olive oil — more is better!

Recognized studies suggest that extra virgin olive oil with high levels of polyphenols:

♥ Promotes a healthy heart / vascular system.

♥ Reduces bad cholesterol (LDL), raises good cholesterol (HDL), and may break down arterial plaque.

♥ Lowers blood pressure.

*2009 Harvest Test Results

- ♥ Lowers glucose levels and helps diabetics.
- ♥ May provide big dividends in preventing various cancers, including colon, prostate, and breast cancer.
- ♥ Slows the aging process and provides beautiful skin.
- ♥ Is a natural anti-inflammatory agent/pain reliever.

Why So Many More Polyphenols?

- ♥ Oil only from Koroneiki olives, which are very high in healthful antioxidants—many more than other olives.
- ♥ Soil, climate, wind, and mountain altitude on Crete.
- ♥ Olives picked when polyphenols the highest.
- ♥ Olives specially processed to preserve polyphenols.
- ♥ Carefully packaged and refrigerated during transport.

We Can Prove It!

- ♥ Polyphenol levels verified by independent laboratory tests: Mediterranean Agronomic Institute, Chania, Greece. Test results available to all.
